

Project ASCIILLES

Once upon a time, in a land far away...

Elli Virtanen

March 2, 2016

160218 - The startup - 1h

Meet with the babes to discuss meeting times, plans etc. Installed friday. Came up with name. Created git.

'Til next time: get to know Friday (have some fika together etc). Elli finds a LaTeX template for the report.

Planned trips: Elli: 26-28 feb Pikas: 1 mars

Later that day: Elli spent an hour on starting out with the report

160220 - Saturday with Friday - 3h

Reinstalled Cabal and the libraries, because Cabal was complaining. The group is at the verge of despair, nothing works as we want it to. And it all turned out ok, thanks to reddit. We'll use juicypixels instead of friday.

160223 - Getting the pixels on track - 3h

ImageTo2dList.hs is starting to take form, still experiencing problems with the modules

160225 - Falling off Track, or so we thought - 3h

Problems with a cold roaming free on campus, the knights of Project Asciilles nevertheless completed the functions asciilate and imageTo2dList. Now our next challenge awaits; the presentation of our glorious arts. (This was later done by Pikas)

160226 - Report controll - 2h

Elli started to write on the report for real.

160229 - Polishing the edges - 2h + 2h

Pikas writes testcases and comments. Elli works on the report, e-mails Carlos. We are getting structured but writing is slow, we have no fika.

160301 - Meeting for a meeting - 1h

We met our supervisor for the first time today due to a missunderstandning, but it seems like we are on the right track. Continued the work with our report

160302 - Almost there - 4h

Started working on our presentation and polished our report.
